FLOWERING SIZE CYMBIDIUMS WITH FLOWER SPIKES

These Hybrids are Offered in Bud, Ready to Bloom and will be available until about the 1st of May. Flowers will be of Good Quality for Corsages. We have already taken many orders for spring shipment and suggest that you place your order early to avoid disappointment.

Most of these hybrids are bred from the World Famous Alexanderi "Westonbirt," FCC, RHS tetraploid stud plant. The Flowers are Large, Heavy Substance and Long Lasting. The Flowers will keep in Good Condition up to Two Months or Longer if left on the plants.

These hybrids are available in Chartreuse, Green, Orange, Pink, White, Yellow, and in various shades of these colors. Selection of color is left to customer. The number of plants in spike is limited; however, we will ship as many of any particular variety to the customer as possible. We reserve the right to substitute varieties when sold out of the variety ordered. This offer includes the following varieties which are from regular Cutflower producing plants and have been selected for their Prolific Blooming and Fine Quality. Also, as last year we will have others such as Dorchester, Blue Smoke, Blue River, San Francisco, Esmeralda, etc. as the buds reach shipping size, and fill orders with these fine varieties when other varieties are too far advanced for shipment.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group and an experimental group. The control group received a standard diet, while the experimental group received a diet supplemented with a specific nutrient. The subjects were then subjected to a series of tests, including a physical performance test and a cognitive test. The results of the tests were compared between the two groups.
